Since the school election this past spring resulted in a vote to consolidate the school districts of Green Garden, Will, Wilton Center and Peotone townships, and which was followed in due time by the electing of a seven man board of education, plans were started at once to so arrange all districts so as to be ready for the opening of school this fall.

One of the main rural problems in this territory was solved by joining two school buildings and moving them to a third. These were the former Harnack school district 151, and the Hasenjaeger school, district 152 which were moved to the school in district 149 located on the northeast corner of the Manhattan and Center road intersection. These three buildings were remodeled into a modern school building with a utility room added.

There are 73 children enrolled in this new district which is now known as the Green Garden Unit of district 207U. They are brought to school each morning by two buses arriving at 8:30 and leave the school for the homeward trip at 3:30. Teachers in this school are Mrs. Hygiene Arnold of Green Garden, Mrs. Mildred Fuchs, Manhattan and Mrs. Lala Knight, Frankfort. They teach the first seven grades. Eighth grade pupils in this area are taken to Peotone by the same buses who convey the high school students to the same village.

The bus drivers are Earl and Jack Christensen who live nearby and are: Irvin Lotz, Peotone, president; who are also maintenance men for the building, which is heated by oil.

Members of the board of education James McGrath, Symerton, secretary; Leo Schroeder and Harold Werner, both of Peotone; William C. Bettenhausen Jr., and Alvin Bettenhausen, Monee township and Milton Curran, Manhattan, Mr. C. L. Walters, principal of the Peotone elementary school is acting supervisor for the new district of 207-U, which has a total of 538 students.

The PTA's of the former Green Garden schools will hold a joint meeting in the town hall Friday evening, Sept. 23, to organize a PTA for the new district 207-U.

The Orland Baseball team feels happy since they won the game at Midlothian last Sunday, playing against the All Stars of the Southwest Community baseball league, with a score of 7 to 0. That ended this season's games.

Although they are not "cocky", they have the courage and ambition to try for something bigger, therefore this Sunday September 25, the Orland B's under the sponsorship of Raschke Bar-B-Q and the Orland American Legion Post, will play the strong Orland Park Merchants. Game time is 2:30 P.M.

The "B" team has won 18 out of 19 starts for a .947 average. While the Merchants had a remarkable season in the midwest league.

In the All Star game last Sunday, Buddy Johnson was again in superb form, allowing only four hits and striking out 10 opposing batters. Orland jumped off to a two run lead in the first inning and iced the game in the seventh when Bill Tuttle doubled with the bases loaded, scoring three runs.

Ellsworth Willison was the starting and losing pitcher for the All Stars. Orland was winning 3-0 when he went out at the end of four innings and was the victim of Bill Tuttle's base clearing double.

Joe Ricci pitched the last inning and faced only three batters. Dubois the All Star shortstop made several sensational stops to rob Orland batters of sure hits.

Both teams hope to see you out next Sunday for the grand finale of a great season.

Capital Comment

FROM THE DEMOCRATIC NATIONAL COMMITTEE, BULLETIN NO. 25

The Democratic National Committee has constantly sought to spur registrations throughout the country in the belief that a large vote means Democratic victory.

What can be done in a practical test of registration drives is shown in a report received by the Democratic National Congressional campaign committee from Somerset County, Pa.

A Republican lead of 1,210 registrations in the test area was wiped out in a ten-week campaign and Democrats now lead in registrations by a net of 323 votes.

All at very low cost! The test came about through the activity of Congressman Anthony Cavaicante of the 23rd Pennsylvania congressional district which comprises the Pennsylvania counties of Fayette and Somerset.

Fayette County is a strongly organized industrial county which had been strongly Democratic.

Somerset County has been traditionally Republican. In 1948 the vote was 18,599 Republican to 10,553 Democratic.

Through the years it has been customary to dismiss Somerset county as hopelessly Republican.

Somerset County was divided into three sections—the Northern section was that area of the county north

of the Lincoln highway. This is a coal mining section with many of the workmen commuting to nearby Johnstown to the steel mills.

The Central section between the Lincoln Highway and the Pennsylvania turnpike, a somewhat sparsely settled area in which the main industrial activity is coal mining.

The Southern Section, south of the Turnpike, is mainly agricultural.

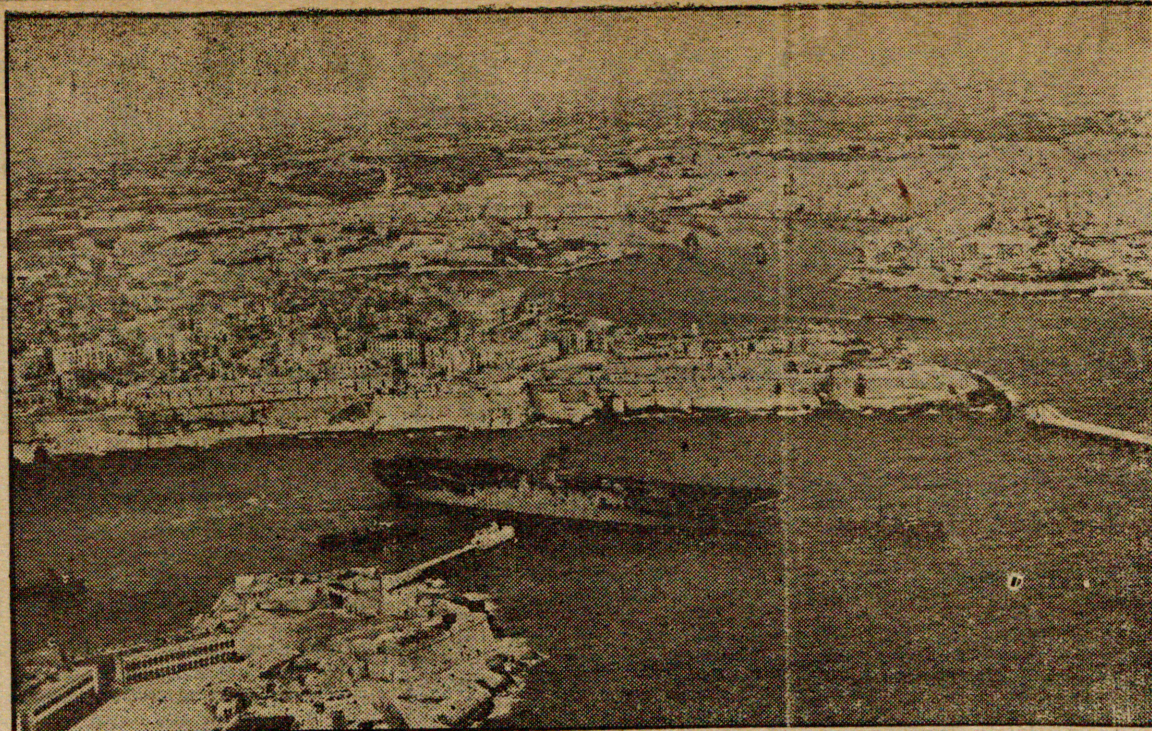

The test was made in the North. The Central and Southern sections were left completely alone to allow a fair comparison between the three zones.

Two men were entrusted with carrying out the test: Gerald Zeigler, secretary of the Somerset County Democratic Committee, and Anthony Rulli, Windber City Democratic Chairman.

The plan was one that excluded outside "big name" help. There was no outside aid in the way of advertising or publicity. The entire effort was in the hands of the Democrats in the area of the test.

First, a working list of all unregistered voters by street and house was drawn. Second, local Democratic clubs were organized in each registration area which supplied the workers who supplied the elbow grease and shoe leather that made the tests successful. Newspapers were enlisted to boost interest. Radio stations in the area were approached for spot announcements.

The list of unregistered voters in each community was broken down into working assignments and the

club members went to work. Result:

The Republican lead in the area of the test was completely erased and a total net gain of 1,313 Democratic registrations was achieved for the entire county.

Comparison of the test area with the sections where no organized drive was made is as follows:

	Rep.	Dem.	Diff.
November 1948			
North (tested)	7082	5872	1210
Central (no test)	7786	2499	5287
South (no test)	3731	2182	1549

	Rep.	Dem.	Diff.
September 1949			
North (tested)	7293	7616	323 D
Central (no test)	8096	2644	5452 R
South (no test)	3917	2381	1536 R

Note that the 1948 lead of the 1210 Republicans in the north of the county has been wiped out and the Democrats now lead by 323.

In the Central part the Republicans have boosted their lead by 165. In the South the 1948 Republican lead has been cut 13.

These figures reflect the difference between effort and non-effort. Total cost of the test was \$200, or approximately ten cents per newly registered voter.

The work was done by the Democratic club members and the money that was spent was only for the purpose of paying for gasoline to drive registrants to the registration office.

It is a real example of how results can be achieved when time and energy are expended in an organized effort.

Registration is the key to Democratic Victory in 1950.

Letters to the Editor

Grande Albergo Fiorina
Torino, Italy, Aug. 28, 1949
Mokena News-Bulletin:

Now that I am settled in Italy I will try to write you a few lines of interest about Italy. Having been here only two weeks, I can not tell you very much, but I will do the best I can with what I have.

My first stop in Italy was Milan, a city of about 1,000,000 population. There I saw some war damage to some of the large buildings of the city; among them the famous Milan Cathedral which was only partly damaged. Milan is quite an industrial city, many of the Italian autos bicycles and motor scooters are manufactured there. I did not stay in Milan very long, so did not see much of it.

My next stop in Italy was Torino where I have been for the past ten days. Torino is a city of about 400,000 population. Torino is also an industrial city and also manufactures autos, bicycles and motor scooters. It also has a large tannery, larger than many in the U. S. Torino is a very beautiful city and is located along the banks of the beautiful river Cremona. On one side of the river is Torino, the other side is a continuous chain of large beautiful hills covered with many trees and flowers. Here are some of the old Castles of the aristocrats, which are very large and beautiful. Along the Torino side of the river are many boat clubs, also places for the public to rent row boats or motor boats.

There is a large park where people can get refreshments and find benches to rest in the shade.

Even though the Italian cars are all very small, even much smaller than the American Austin, there are few cars on the streets, because few

people can afford to own one. Gasoline is very high and gas stations are few and far between. Most people use bicycles, motor scooters or motorcycles for transportation. Many bicycles and scooters are built so that as many as three people can ride on one vehicle. There is while crossing the street, but you not much danger being hit by a car sure must watch the bicycles and motor scooters. There is fairly good street car service, but the cars are very small and always crowded.

I was very curious to see the railroad cars and the main railroad station which was badly damaged by war bombs. If the Mokena people had to ride to and from work on these Italian commuter trains, they sure would have something to kick about. These trains consist of a small electric motor, a steam locomotive, and a line of small cars with very few seats. Very often many of the cars are small box cars with one or two plain wooden benches. The reason they have so few seats in the cars, including street cars, is that they can get more people in a car, by having them stand.

My first dinner in Italy cost \$1200.00 and the waiters tip was \$150.00, but before I go any further with this I will explain: An American dollar is worth \$608.00 in Italian money or 608 Lira. The value of money is so low that no small change is used, or no coin. The smallest money is a 5 Lira paper bill and is about half as large as a U. S. dollar bill. While a 1000 Lira bill is about six inches wide and ten inches long. The average factory worker earns about 1000 Lira per day, but he has to spend about 8,000 Lira for one shirt and about 12,000 Lira for a pair of good shoes. From what I have seen here, there seems to be plenty of food and clothes and it is all ration free. How ever food and clothes are so high that few people can afford to buy what they should have. I saw street laborers working barefooted. There are many unemployed in Italy and they receive only 100 Lira per day for relief. Of course things are improving very fast here and conditions should be very good in another year or so.

The weather is very nice and the winters are not very cold. There are a few small farms near here. Much fruit is grown nearby, such as peaches, plums, grapes, water melons etc. Italy does not produce enough commodities for its own use and depends largely on other countries for everything it uses and that is why everything is so high here.

Researchers for the World Book Encyclopedia have discovered that during the gaslight era in San Francisco a reporter wished to coin a name for a gang of thugs. The leader of the gang was a man called McDoon, so the young journalist took the name and reversed it—making it "Noodlum."

President of Public Service Co. Tells Of New Industries

Britton I. Budd, president of Public Service Company of Northern Illinois, told a conference of utility executives and engineers last week that cooperative promotional efforts of four utility companies serving Chicago and northern Illinois had resulted in 548 new industries and branch plants arranging to locate in the area since the close of the war.

"These plants," said Budd, "will employ about 69,000 people and will account for about six million dollars in annual electric and gas revenues to the four sponsoring utility companies — Commonwealth Edison, Public Service Company, Western United Gas and Electric Company and Illinois Northern Utilities Company."

Of the 548 new industries locating in the area since V-J Day, 111 were in Chicago and 192 in the nearby suburbs, he said. Another 41 moved into the Joliet-Will county area, 27 into the Kankakee area 32 into the Waukegan-Lake county area, 46 to the Aurora-Elgin region, and 99 to other communities scattered across the northern part of the state.

Budd said that the Chicago-northern Illinois group of utilities was the first in the country to undertake such an industrial development program on a broad scale. The program he said, in bringing the many new industries into the area had also increased income to merchants and all kinds of business due to higher consumer demands from new employees and their families.

"After months of study by our research staff," Budd said, "the conclusion has been reached that, in addition to the outstanding industrial resources possessed by this region, there is nothing which offers more appeal to industries contemplating new locations than unsurpassed medical and educational facilities. Studies show that the Chicago area possesses educational and medical facilities equal to or superior to those of any other region."

Some of the reasons why industry follows education and medicine were listed by Budd as follows:

1. Superior educational and medical facilities make a community a good place in which to live.

2. Industrial executives look for adequate medical services for themselves, their families and their employees.

3. Scientific research to help solve industrial problems is always available. Outstanding examples . . . University of Chicago's Institute of Nuclear Studies, the Institute of the Study of Metals, the Institute of

Radiobiology and Biophysics, the nearby great Atomic Energy Commission plant for the study of peace time use of atomic energy.

4. Industry is interested in the output of universities and colleges, since the graduates are those who go to work for industry; and post-graduates continue in research.

5. Industry is interested in the opportunity for its own employees to improve their educational qualifications, while they are employed.

6. Industry is interested in the advantages of great museums of science and industry, great scientific and other libraries and the exceptional opportunities offered by the professional schools of law, art, music and languages.

7. A well-trained and skilled supply of labor depends on good schools at every level of education and problems between labor and industry can be reduced to a minimum by education.

Budd said the four utility companies would continue to prosecute their program vigorously to insure the Chicago-northern Illinois region of obtaining still more industries through national advertising of this great industrial empire.

Kenneth Hansen Wednesday evening to draw up plans for the management of the New Lenox youth center, which is held in the parish hall of the church. The board is composed of Mrs. Meredith Runk of Frankfort, Mr. Darwin Cooper, Mrs. Arthur Rowsell, Mrs. Walter Goshub, Mrs. Laura Morris and Mrs. Sam Carr. It was agreed that a youth committee of three be selected to meet with the advisory board each month to help plan the activities of the Center.

At the Youth meeting held in the parish hall last Thursday, three members were appointed: Mickey Norton, David Palmer and Betty Jo Oster. The Youth Center will be open the first and third Thursday evenings of the month, and all youths from the seventh and eighth grades, together with the high school group, are cordially invited to attend. There will be fun and food and the time is from 7:30 to 10:00 o'clock.

The New Lenox Volunteer firemen and their families enjoyed a picnic Sunday at the Schmuhl woods with the Lions club members and their families as guests. The firemen hold this picnic each

year as an aftermath entertainment for the workers at their annual Labor Day picnic. Dinner was served at one o'clock after which games were played and prizes awarded. A baseball game was also enjoyed. Mrs. Emma Selk of Plymouth, Neb., arrived here this morning to spend several weeks with relatives and friends. At present she is at the Emil Braun home.

MILLION DOLLAR SMILES—On board the liner Mauretania Chancellor of the Exchequer Sir Stafford Cripps and Foreign Minister Ernest Bevin look happy as they sail for New York. The two statesmen are representing Britain in a series of highly critical discussions with U. S. and Canadian experts on dollar differences.

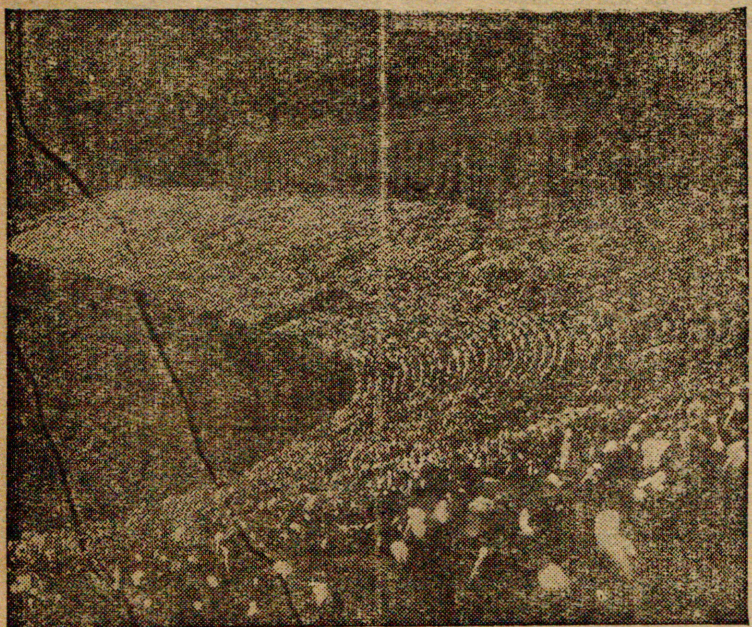

GET 'EM WHILE THEY'RE HOT—Shabby goods and shiny new propaganda featured the German trade fair in Leipzig, Germany, a twice-yearly event that has been held since the middle ages. Here, Leipzigers look and buy at a Soviet-licensed hot-dog stand. Although a pair of the frankfurters costs about a day's wages, everybody's buying, because, when the fair is closed, there'll be no more dogs.

WILLING HELPER—This friendly-looking Pandora Chimp, resident at the Philadelphia Zoo, clears the way for a giant bulldozer. The task is one of breaking ground for a new lion house at the zoo. If the chimp's doing more than his share, it's probably because he wants to make sure the lions are kept well within bounds.

MUSIC BY MATCHLIGHT

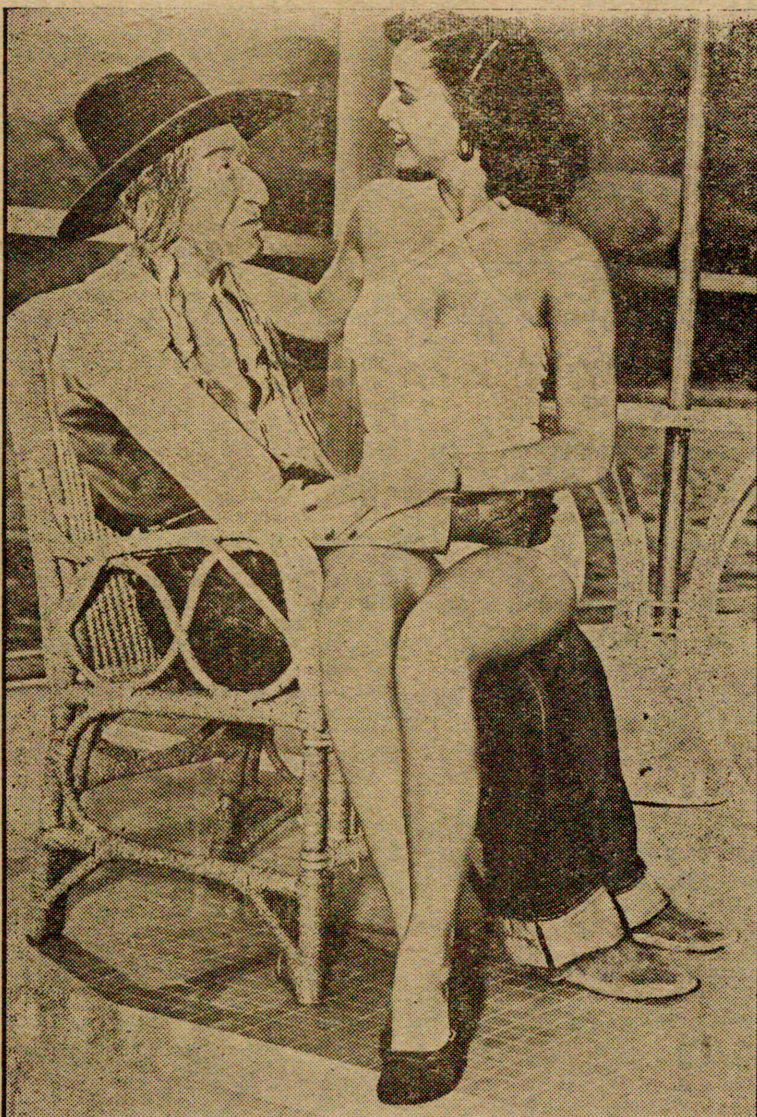

This is what Soldier Field in Chicago looked like when more than 95,000 spectators and participants at the Chicagoland Music Festival lighted matches with all other illumination extinguished.

IRISH OPEN UP—Preparatory to tearing up other football players, Emil Sitko, Notre Dame half-back, tears up a paper sign announcing the South Bend, Ind., university's first practice session of 1949. The determined-looking gentleman who holds the ball for Sitko is veteran coach Frank Leahy. Co-captains Jim Martin, left, and Leon Hart hold the sign up. The other squad members look like they're able to take care of themselves.

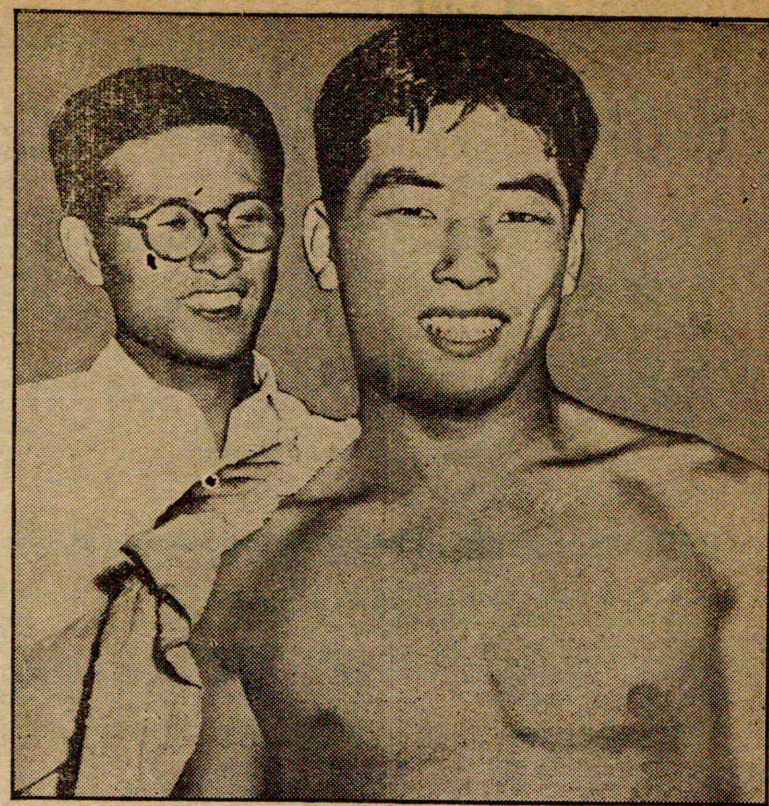

MR. TRUMAN GOES TO THE FAIR—President Truman looks over a display of Iowa corn which won the state fair sweepstakes at Packwood, Ia. Helping hold the tray are Harold Russell, left, handless movie star and new national commander of the Amvets, and Harold Keats, of Ft. Lauderdale, Fla., past national commander.

POW-WOW—Mrs. Raye Donnelly Williams, 23, was crowned queen of the Broadmoor beauty parade at Colorado Springs, Colo., by a group of judges who were so taken by the display of pulchritude they all had to have wheelchairs. Mrs. Williams seems to be trying to bribe the Judge of Complaints, Chief White Horse of the Eastern Mucchee Tribe. The jaundiced-eyed wooden Indian has been staying at the Broadmoor Hotel during a recent governors' conference.

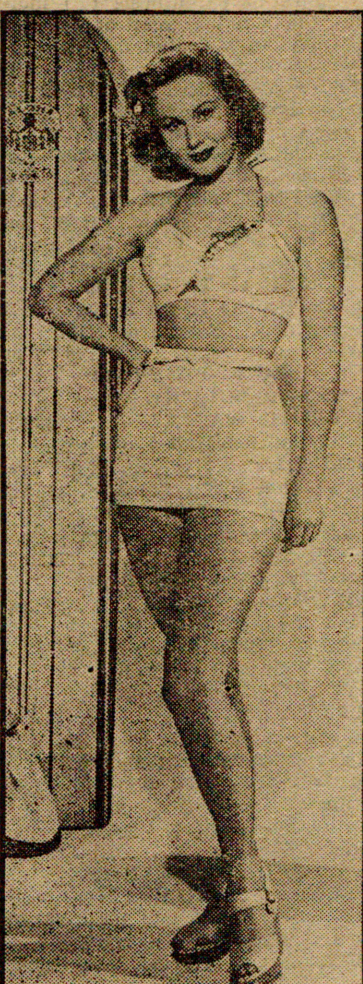

OLD-TIMER LEARNS NEW TRICKS—Marty Hess, left, of the Nevada Uranium School, first of its kind in the world, shows old-timer William "Dragline" Miller, 73, how to use a Geiger counter in identifying uranium ore. Prospector Miller was one of the hundreds of mining men who learned the latest prospecting techniques at the Nevada Fair of Industry at Ely, Nev.

FLYING FISH—Japan's "Flying Fish," Hironoshin Furuhashi, gets a rubdown after he won the 800-meter race in the 1949 Amateur Athletic Swimming and Diving championships held at Los Angeles. Hironoshin set a new record with a time of 9:35.5 minutes, beating the old record set by Bill Smith in Honolulu in 1941 by a full 15 seconds. The man with the towel is team captain Schuichi Murayama, no slowpoke himself.

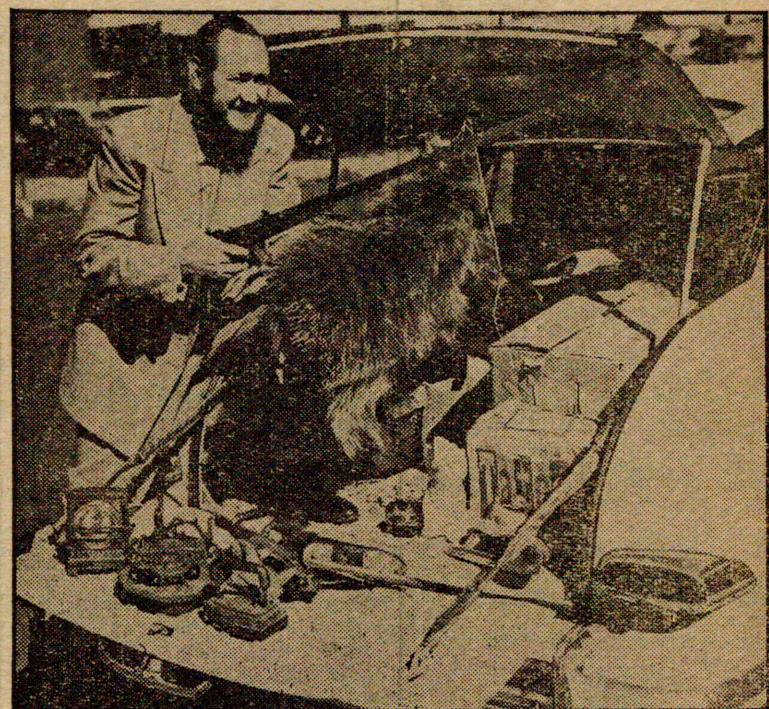

EARLY BIRD—When a fishing stream was opened exclusively for youngsters under 16 at Las Vegas, Nev., 14-year-old Barbara Proffitt was first on the scene. For all her efforts, nobody will say Barbara didn't deserve making the fine catch above. The U. S. Fish and Wildlife Service stocked the stream especially for the kids, who don't even need a license.

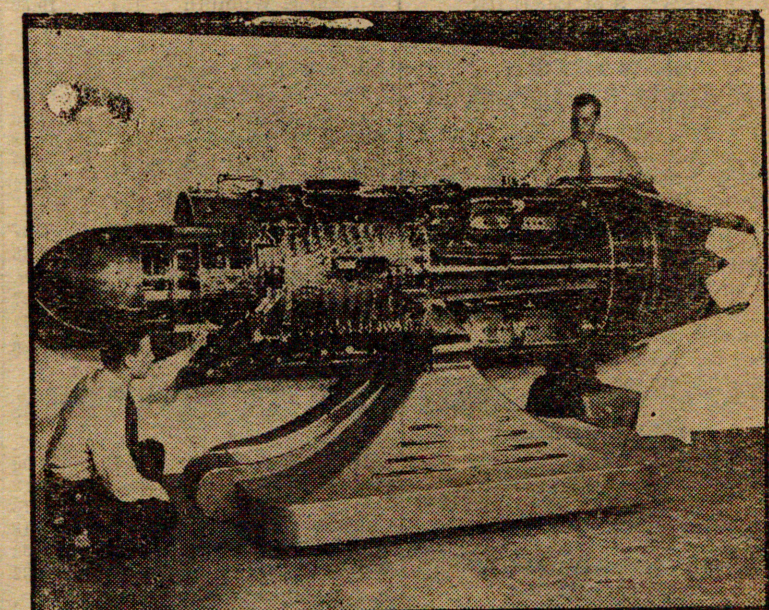

LUCKY FISH—Far from the fury of wind and wave, Hollywood's Virginia Mayo displays the latest in beach equipment and dress plus a little bit of Mayo, too.

THERE MUST BE A WAY OUT—Four youthful scholars are harshly reminded that summer is over as they walk past the stark walls of Public School No. 114 in New York City. The four sorrowful vacation boosters are, left to right: Harold Andrews, 8, Steve Lynch, 8, his brother Joseph, 9, and Harold Schultz, 13. We sympathize with you, fellows.

PRINCE OF THE PARLAYERS—Jim Moran, self-styled "sultan of swap," stopped off at Omaha, Neb., to employ his talents on a busy corner. He has parlayed a pile of bubble gum into over \$2000 worth of merchandise in a nation-wide tour. Moran was scheduled to auction off all of his loot on a television show in New York and donate the proceeds to a national society for the prevention of skin disease.

CUT-AWAY JET ON DISPLAY—By means of this jet engine, internal operation of the J-47 turbojet—which powers the Air Force's largest and fastest jet planes—is demonstrated publicly for the first time at Cleveland, Ohio. The engine is cut away to show the movements of its internal parts, never before revealed except in general terms. Looking on are engineers Richard C. Miller and Albert W. Schairbaum.

Dr. Foreman poetry.

Why the appeal of poetry? For one thing, it is vivid. It is in colors, not severe black and white. It lives and breathes, at times it shouts, and it always sings.

It is true to say "The providential oversight of the Creator is continuous and unremitting," but it is more effective to say, "The Lord is my shepherd." It would be true to say, "The evidences of creative and beneficent purpose can be seen throughout all the orders of nature," but how much more vivid is the 148th Psalm, calling on hail and fire, sun and moon and stars of light, to praise the Lord!

Another secret of poetry's power is that it is the language of emotion. Professors and theologians may be saying the same things as the poet, and maybe even saying them more completely and accurately; but what they say is less easy to remember.

So these emotional Psalms will always appeal, even to the professor when off duty, because they make us feel religion and not merely think it.

For centuries it was the hymnal of the Christian church. Indeed, up to recent years some large denominations would allow in public worship the singing of no other songs than the Psalms.

Many of our best hymns and popular gospel songs, as we have already seen, are based on Psalms. "Rock of Ages, cleft for me," "A Shelter in the Time of Storm," "Hiding in Thee," — they all go back to the Psalmist's picture of God as a Rock (Ps. 42:9). The Psalmist was not thinking of a little rock in a cornfield. He was thinking of some tall crag in the fierce hot landscape of his country.

A rock there is a landmark, it is a shelter against the blazing sun, people could live under its overhanging height.

So God is the landmark of life, he gives direction to our ways; he is the shelter on life's weary journey, he is our safe dwelling.

So with the many other pictures of God in the Psalms—he is light, he is shade, he is the guard on duty at night watching over the sleeping city (Ps. 121); he is a shepherd, he is water for the thirsting soul (Ps. 42.)

A Model Hymnal

IT IS true that few Christians today can use in worship all of the Psalms, without omissions or changes. It is also true that practically all Christian churches find that the Psalms, by themselves, are inadequate to express all there is in Christian experience, faith and ideals.

The Christian hymn, entirely independent of the Psalms, has long since come into its own. And yet the Psalms remain the model hymnal. For in them beauty and truth are blended.

This should be the ideal of all Christian hymn and song books. Some of our modern "hymns" as well as some older ones, are bad because they are no better than jingles, —doggerel, not poetry, and often sung to tunes better suited to a juke box; and some are bad because they convey either nonsense or downright falsehood.

But the great hymns, and the best hymnals, are those which like the Psalms of old, combine profound truths about God and man, duty and destiny, with stately, stirring and singable music, aglow with the beauty and power of words.

SCRIPTURE: Psalms 23; 42; 60; 121; 148.
DEVOTIONAL READING: Psalm 63:1-4.

The Psalms We Sing

Lesson for September 25, 1949

IT WOULD be a most unusual person who on his dying bed would turn to the 23rd chapter of I Chronicles and not to the 23rd Psalm. If the reader will think of his own favorite passage of Scripture, and then look them up in some edition which prints the Bible in a modern format, he will discover that his favorite passages are probably all Dr. Foreman poetry.

Wm. Martin Post 725 VFW, Mokena

On next Sunday afternoon, Sept. 25, the Fifth District Veterans of Foreign Wars Department of Ill. will meet in Joliet, Ill. This meeting will be in the new Post home of Cantigny Post No. 367, Horse shoe drive. Delegates to this Convention from Wm. Martin Post No. 725 are: Marshall K. Muller, William Westman, Fred Hentsch and Glenn C. Peterson. All Post members are invited to attend this meeting and enjoy seeing Cantigny Post's beautiful new home. You will like it.

The Finance and Building Committees are striving hard to have our new Home completed as soon as possible. Several inquiries have been made for use of the building, thus indicating that as soon as completed it will be a busy place, a building for the Mokena Community to use and at a rental price that will be within reason for anyone.

In turn the Committees are asking the Public as well as members of the post for both physical and financial aid to complete the building. If you have physical aid to offer see the Building Committee, if financial, see the Finance Committee for interest bearing bonds.

To Post Members, next post meeting Thursday evening, Sept. 22, 8 p.m. Hatch hall, Mokena.

Issues Appeal for Emergency Drive

This is "Polio Emergency Week" in Illinois by proclamation of Governor Adlai E. Stevenson who urges the people of the state to contribute generously in the Polio Epidemic Emergency Drive being conducted by the National Foundation for Infantile Paralysis.

The drive was made necessary, according to Foundation officials, because 20,513 cases of polio had been reported through August 27 as compared with 11,155 in the same period last year. Illinois, third state of the Union in polio incidence, had registered on September 8, 1,890 cases since January 1, which compared with 468 cases for the same period last year.

The Foundation started the current drive to raise \$14,500,000 because, according to the announcement, it is faced with the "virtual certainty" that there would be 40,000 polio cases in the Nation by the end of the year. It declared the March of Dimes funds were now being spent at the rate of \$100,000 a day, leaving only \$1,500,000 in the National Epidemic Aid Fund. It was estimated that this amount would last "no more than 11 days at the current rate of expenditure."

The following joint statement was issued by Illinois state representatives of the National Foundation for Infantile Paralysis: "A very high percentage of families directly affected by the high case incidence in Illinois and other states have come to the National Foundation chapters for financial assistance.

"The 1949 March of Dimes netted approximately \$23,000,000. It is estimated that for patient care alone \$23,500,000 will be needed by the end of the year. Add to that an all important research and educational program and it will be realized that funds will be completely exhausted long before the end of the year.

"Since January 1 to date \$5,518,164 has been sent into the epidemic areas and the bills are just now beginning to catch up with the chapters. The period of highest spending occurs between now and the end

TRACTOR—

JOHN DEERE ROLL-O-MATIC "Knee Action" FRONT WHEELS

Working on beds . . . in deep water furrows . . . along the contour . . . over rough fields—there's hardly a condition you can name where John Deere Roll-O-Matic "Knee-Action" Front Wheels won't make tractor operation easier, smoother, safer than ever before.

Steering is much easier because the load is always balanced between both front wheels . . . riding is greatly improved because up-and-down movement of the front end is cut exactly in half. There's less wear on front tires, less strain on wheels because each tire and wheel takes its full share of the load.

Roll-O-Matic is just one of many exclusive and advanced features that make John Deere tractors today's leaders in modern design, just as two-cylinder economy, dependability, and long life have made John Deere tractors leaders in proved performance for the past 25 years. Come in and see us soon.
